

PivoGem™ – Smart Solutions for Demanding Pivot Irrigation

Baccara's PivoGem™ series is specially designed for pivot irrigation systems operating under continuous work cycles, High humidity, voltage fluctuations, and harsh field conditions.

- ✦ High resistance to humidity and water exposure
- ✦ Long service life in field conditions
- ✦ Reliable operation under voltage fluctuations
- ✦ Designed for continuous operation
- ✦ Suitable for harsh environmental conditions

GEM-A for Pivots

Heavy-duty solenoid designed specifically for pivot irrigation applications.

VRI VALVE

Advanced solution for Variable Rate Irrigation (VRI) systems with reliable long life performance.

G75-S & G75-S2

Hydraulic valves for precise irrigation control, high efficiency, and continuous operation.

Dripdoser

Smart lubrication solution for vertical turbine pumps, designed for reliable continuous operation and improved system protection.
